CALL FOR APPLICATIONS

for scholarships for students with outstanding professional and/or innovation achievements

The Faculty of Informatics, University of Debrecen, awards scholarships from its own revenues through an application process to students with outstanding professional and/or innovation achievements.

The aim of this call is to recognise and support exceptional and significant student achievements that are of outstanding professional, scientific or innovative value, are noteworthy at national or international level, and contribute to the professional reputation and objectives of the Faculty of Informatics.

Eligible applicants

Applications may be submitted by students of the Faculty of Informatics at the University of Debrecen who have active student status.

Achievements eligible for support

Applications may be submitted for verifiable professional and/or innovation achievements that exceed the performance normally expected of students during their studies.

Such achievements may include, in particular:

- outstanding results in national or international professional, scientific, IT or innovation competitions;
- outstanding scientific or research achievements;
- innovative developments with significant professional or practical impact;
- achievements widely recognised by national or international professional communities;

This list is not exhaustive; applicants may also present other outstanding professional achievements supported by appropriate evidence.

The scholarship

The Professional Committee of the Research and Development Coordination Centre (FIRCC) of the Faculty of Informatics, University of Debrecen, decides on scholarship awards and amounts based on the professional significance of each achievement and the available funds.

Submitting an application does not in itself confer entitlement to a scholarship.

Submission of applications

Applications may be submitted on a rolling basis for as long as this call for applications remains available on the Faculty of Informatics website.

Applications must be submitted electronically by emailing the completed application form, together with documents describing and verifying the achievement, to the following address:

fircc@inf.unideb.hu

Applicants may attach any documents, certificates or electronic references that help assess the professional merit of the achievement.

Evaluation of applications

Applications received are evaluated by the FIRCC Professional Committee on professional grounds.

In its evaluation, the Committee considers, in particular, the professional quality and significance of the achievement, its novelty, recognition at national or international level, practical or scientific impact, and its relevance to the professional activities and reputation of the Faculty of Informatics.

The Committee may request additional information or documents from the applicant if necessary.

Debrecen, 23 November 2026

Prof. Dr. András Hajdu
Dean
