

Dear Students,

Based on rectorial instructions, the Faculty of Informatics will switch to online (remote) education from Monday (09 November 2020). That is, the lessons should be held remotely -- except that they critically need personal presence -- at the same time as before.

The lecturers will inform you regarding their online teaching practice.

Since education will be on a remote basis from Monday, it is recommended to limit the physical presence in the Faculty's buildings e.g. regarding administrative issues, as well.

With best wishes,
Dr. Andras Hajdu
dean
Faculty of Informatics
