to the works of **Dr. J. Sztrik**

9 February, 2018

1. Multiprogramming with heterogeneous jobs
Alkalmazott Matematikai Lapok 8 (1982) 285-296

Tomkó J. :
Semi-Markov analysis of the inhomogeneous machine interference model
Lecture Notes in Control and Information Sciences 84 (1986) 992-1001

2. On the machine interference problem
Publicationes Mathematicae 30 (1983) 165 - 175

Alazemi H.M.K., Margolis A., Choi J., Vijayakumar R., Roy S. :
Analyis of 802.11 DCF with Heterogeneous Non-Saturated Nodes
UWEE Technical Report 2006-0004 (2006)

Alazemi H.M.K., Margolis A., Choi J., Vijayakumar R., Roy S. :
Stochastic modeling and analysis of 802.11 DCF with heterogeneous non-saturated nodes
Computer Communications 30 (2007) 3652-3661

Babitskii A.V. , Dudin V.I. , Klimenok V.I.:
On calculation of the characteristics of unreliable queueing systems with finite source
Automation and Remote Control 57 (1996) 75-84

Huang K.P.:
Scheduling the extended machine interference problem
PhD Dissertation, Texas Technical University (1993)

Ishigaki M., Takagi H., Takahashi Y., Hasewaga T. :
Throughput and Fairness Analysis of Prioritized Multiprocessor Bus Arbitration Protocols
TR 0051 08/17/90, IBM Tokyo (1990)

Ishigaki M., Takagi H., Takahashi Y., Hasewaga T. :
Throughput and Fairness Analysis of Prioritized Multiprocessor Bus Arbitration Protocols
Proceedings of Symposium on Shared (1991) 166-174

Jayaraman R., Matis T. :
Finite population models – Single station queues
Wiley Encyclopedia of Operations Research and Management Sciences, 2010, 1 – 6

Rahmoune F., Aissani D. :
Approximation dans les systemes reparables de fiabilite avec maintenance preventive
Proceedings of Conference QUALITA'2005 (2005)

Takagi H. :
Queueing Analysis of Vacation Models
TR87-0043 6/22/88, IBM Tokyo (1988)

Takagi H. :
Analysis of an M/G/1//N Queue with Server's Multiple Vacations
Proceedings of TIMS, Osaka (1989)

Takagi H. :
Analysis of an M/G/1//N Queue with Server's Multiple Vacations
TR 0033 01/18/90, IBM Tokyo (1990)

Takagi H. :
Analysis of an M/G/1//N queue with muliple server vacations, and it application to a polling model
J. Oper. Res. Soc. Japan 35 (1992) 300-315

Takagi H. :
Queueing Analysis; A Foundation of Performance Evaluation, Vol. 2., Finite Systems
North-Holland, Amsterdam (1993)

Takagi H. :
M/G/1//N queues with vacations and exhaustive service
Oper. Res. 42 (1994) 926-939

Takine T., Takagi H., Takahashi Y., Hasewaga T. :
Analysis of Asymmetric Single-Buffer Polling and Priority Systems
TR87-0044 7/01/88, IBM Tokyo (1988)

Takine T., Takagi H., Takahashi Y., Hasewaga T. :
Analysis of Asymmetric Single-Buffer Polling and Priority System
Performance Evaluation 11 (1990) 253-264

Takine T., Hasewaga T. :
A cyclic-service finite source model with round- robin scheduling
Queueing Systems ll (1992) 91-108

3. Probability model for non-homogeneous multiprogramming computer systems
Acta Cybernetica 6 (1983) 93-101

Bunday B., Khorram E. :
The finite source queueing model for multiprogrammed computer. system with different CPU times
SOR 87-16, Univ. Bradford, England (1987)

Bunday B., Khorram E. :
The finite source queueing model for multiprogrammed computer. systems with different CPU times
Acta Cybernetica 8 (1988) 353-359

Bunday B., Khorram E. :
The efficiency of two groups of machines cared for by r operatives
